

DesignScape3D™ Download and Installation for Android

To download DesignScape3D for Android, You will need the user name and password for which you registered to sign into DesignScape3D once you install it on your tablet.

To download DesignScape3D for Android, please paste <http://designscape3d.mactac.com/apps/ds3tab.php> into your browser address bar.

Click on the download link to install the app. Choose the Android version and download. If your tablet offers a choice between using the 'Package Installer' and the 'Android Installer', choose the 'Package Installer' since DesignScape3D is a custom business-to-business app.

When the download is complete, sign in with the user name and password set up at registration. Accept the warranty information to proceed. The content will begin to download and progress noted in the status bar in the lower right corner. When the status bar disappears, DesignScape3D is ready to use.

When the download is complete, sign in with the user name and password set up at registration.

Installation tips:

- a. You may see a security warning about app. It's provided because app is not downloaded from Google and can be ignored for DesignScape3D.
- b. You may be offered a choice between the 'Package Installer' and the 'Android Installer'. Select 'Package Installer'. The Android Installer is for Google store apps and will not allow DesignScape3D to install.
- c. If you can't sign into DesignScape3D or forgot your user name or password, contact designscape3d@mactac.com.
