DURABLE FILMS

LABELS THAT LAST A LIFETIME

Job Ready for High Performance Applications

MACTac® now offers label converters and end-users a growing line of durable film label stocks engineered with high performance durable adhesives. Many of these products are UL & cUL recognized for both *indoor and outdoor applications* and several are *IMDG (International Maritime Dangerous Goods) compliant*. All stocks are readily available as trimless, some are also available spliceless and many products are available with same day shipping.

Designed for long term durability and performance in harsh environments

MACTac Durable Films stick and stay stuck on a wide variety of substrates for the life of the application. They provide protection against solvents and chemicals, temperature extremes, UV light, moisture and abrasion.

A wide variety of facestocks provide unique solutions for every application in appearance, durability and desired print technology.

JOB READY FOR GROWING DURABLE LABEL TRENDS

Lawn & Garden Equipment

- Metallized Polyester – Bright, Matte & Brushed
- Void Polyester and other Security Label Stocks
- BOPP
- Vinyl
- Overlaminated Films
- Laminating Adhesives
- Protective Masking

MACTac® Durable Adhesives Make Demanding Jobs Easy

Several advanced adhesive formulations deliver extremely smooth, uniform adhesion power. They provide excellent peel, tack, and shear properties and are ideal for both high surface energy (HSE) and low surface energy (LSE) substrates. The adhesives have a service temperature range from -40° F to 300° F and are resistant to chemical, solvent, light and moisture exposure.
